## The Human Electrical Forces!

How They Control the Organs of the Body.

The electrical force of the human body, as the nerve fluid may be termed, is an especially attractive department of science, as it exerts so marked an influence on the health

the nerve fluid may be termed, is an especially attractive department of science, as it exerts so marked an influence on the health of the organs of the body. Nerve force is produced by the brain and conveyed by means of the nerves to the various organs of the body, ibus supplying the latter with the vitality necessary to insure their health. The pneumogastric nerve, as shown here, may be said to be the most important of the entire nerve system, as it supplies the heart, lungs, stomach, bowels, etc., with the nerve force necessary to keep them active and healthy. As will be seen by the cutthe long nerve descending from the base of the brain and terminating in the bowels is the pneumogastric, while the numerous little branches supply the heart, lungs and stomach with necessary vitality. When the brain becomes in any way discordered by irritability or exhaustion, the nerve force which it supplies is lessened, and the organs receiving the diminished supply are consequently weakened.

Physicians generally fail to recognize the importance of this fact, but treat the organ itself instead of the cause of the trouble. The noted specialist, Franklin Miles, M. D., LL. B., has given the greater part of his life to the study of this subject, and the principal discoveries concerning it are due to his efforts. Dr. Miles' Restorative Nervine, the unrivaled brain and nerve food, is prepared on the principal that all nervous and many other nerve centers. Its wonderful success in curing these disorders is testified to by thousands in every part of the land.

Restorative Nervine cures sleeplessness, nervous prostration, dizziness, hysteria, sexual debility, St. Vitus dance, epilepsy, etc. It is free from opiates or dangerous drugs. It is sold on a positive guarantee by all druggists, or sent direct by the Dr. Miles Medical Co., Elkhart, Ind., on receipt of price, Si per bottle, Six bottles for \$5, express prepaid.

## GENUINE SENSATION

At the Democratic Banquet at Columbus, Ohio.

## PRESIDENT M. E. INGALLS' SPEECH

In Response to the Toast to the Platform of 1892-Cleveland Severely Criticised and the Wilson Bill Denounced-Its Passage Will Be Ruinous to the Country and Will Lose West Virginia and Virginia From the Democratic Party-He Calls on Democrats to Cover their Heads in Shame-Impractical Theorists Who Attempt to Legislate on Business Questions-Who Asked for Free

Columbus, O., Jan. 9.-Hon. M. E. Ingalls, of Cincinnati, president of the Big Four railroad, created a sensation at the Democratic Jackson Club banquett last night in speaking to the toast, 'The Chicago Platform of 1892." Speaking of the repeal of the Sherman act he said: "It was brought about by Republican votes, and they got more credit perhaps than we did for the repeal. It seems to me that the administration is also open to criticism that it did not by conference and consultation arrange a compromise bill that would practically accomplish the same results and which could have been passed with Democratic votes and as a Democratic measure."

Referring to President Cleveland, he

"The theory that the king can do no wrong will never succeed in this country. Neither does all knowledge, all wisdom lie with the President and his advisers. The criticisms I make here to-night I make as a Democrat, as one who voted for Cleveland three successive presidential elections. We are in the midst of evil times—mills have stopped, industry is paralyzed, and everywhere idle men are filling the streets and asking for work, and there is none. No such calamity has ever be-fore befallen this community in its history. The committee on ways and means has sent to Congress a tariff bill which in addition to the deficit of \$50,-000,000 will produce \$75,000,000 more of oss, leaving the government at the end of the fiscal year short \$125,000,000 un-less it can be made up in other ways. How do you expect to make up this \$125,000,000?

WAS EVER SUCH FOLLY?

"Cover your heads in shame, my fellow Democrats, for your party in power these days of peace propose to so back and enact the war taxes of the past; and why? in order that they may make a tariff framed according to the theories of a few men familiar only with the bocks and reduce the duties on certain articles which do not demand it and make certain articles free which are not called for. Was ever such folly? The gentleman who fathers this measure is a distinguished member of Congress, coming from a little village in the mountains of West Virginia. He is a student of the doctrine of free trade and well educated as a theorist. By some chance he is made chairman of the committee of ways and means, and is put astride of the commerce of this country and proposes to demonstrate his theories, although in so doing he may wreck the country and the party.

"Just as sure as you place coal and iron upon the free list, so sure will Vir-ginia and West Virginia leave the Democratic column at the next election. Tell me where are you to get the electoral votes to take their place? Can you placate mugwumps enough in New England to give you the votes there that you lose in the south?

COAL AS RAW MATERIAL.

"What justification is there in free coal? None, except that the books say raw material should be free, and this committee, with no business experience, but wedded to their theories, have classed coal as a raw material, when every ton at the mouth of the pit represents 90 per cent of labor and 10 per cent of material. It would seem to me that if you wished protection for labor here was a better chance for it than anywhere else. Who asks for free coal? The people? No; no one except a few New England and New York speculators who rushed over into Nova Scotis the week after election, when they thought they could establish free trade, and bought everything that could be brought in here if the duties were taken off, from a coal mine to a lime

"While this committee of ours graciously allows the coal of her majesty Queen Victoria to come in here and displace our own and break down a half million of our laborers, the thrifty Canuck smiles and still charges us 60 cents a ton for all that we sell in his western dominions. Verily, this committee of ways and means are great and patriotic gentlemen. In behalf of the great body of business men of this country I protest against experiments at this time. In behalf of the Democratic rank and file I protest against a measure which, if passed, will turn the country over to the Republicans. I wish I could reach every Democrat in the land to arouse them to action so that they would make their objections felt with their congressmen.

RUSHING TO DEFEAT.

"It is a time of peril to the party. I would sound the alarm, 'To your tents, O Israel.' Unless we can bring about a change in the administration, unless we can stop that so-called Wilson bill in Congress, we shall go down as a party to helpless defeat on the next election, and it will be years before the people will trust us again. We want Congress to stop experimenting for the benefit of a few theorists and scholars." The address was vociferously applauded.

Man wants but little here below,
But wants that little good.
Nine out of ten men when asking for a drink, will simply ask for "something good," and out of the nine there are not two who know when a drink of good whiskey, brandy, gin or rum is sold them. Few hotels or venders of liquors can assure their customers that the liquors set before them are absolutely pure and old. One tastes almost as good as the other; but if you want to be sure that you are buying only a pure liquor, we advise you to look at the bottle and see if the name of Max Klein is blown in the bottle, and his signature on the label, and if you see it there, you can bet your best dollar that you are getting a "straight" article. His Silver Age, Duquesne and Bear Creek Ryes recommended by physiciaus and men of all professions. For sale by Wheeling Drug Company.

Needing a tonic, or children who want building up, should take
BROWN'S IRON BITTERS.
It is pleasant; cures Malaria, Indigestion,
Billousness, Liver Complaints and Neuralgia.

FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, Jan. 9 .- Money on call easy at 1 per cent; last loan at 1 per cent, closed at 1 per cent. Prime mercantile paper 3½a5½ per cent. Sterling exchange strong at \$1 82¾a4 87½. The total sales of stocks were 193,100 shares.

Sterling exchange strong at \$\frac{81}{2}\square\$4244 \quad 87\frac{1}{2}\cdot\$4. The total sales of stocks were 193,100 shares.

On the stock exchange to-day the volume of business was light, the speculation without settled tone and the trading purely professional. There was no very great pressure to sell, nor was there any particularly strong buying movement, although there were occasional bear raids and times when stocks were readily absorbed. But of animation there was none. London was not in the market to any appreciable extent, the commission houses were idle and there was a scarcity of orders from outside on both sides of the account. What little news of interest in the market was stirring had little; or no effect upon prices which moved up and down lazily within narrow limits as a rule, as the respective stocks were offered for sale or bid for. St. Paul showed the most activity, being bought moderately by London houses. The other Grangers were dealt in also to a great extent, but show small changes. Considerable Western Union stock changed hands, closing at a slight gain over yesterday. Sugar was not neglected by the traders. Compared with yesterday's closing figures the final sales of to-day show but slight changes, and they are on both sides of the account in the active list. The specialties in a few instances show material losses and gains.

Railway bonds were weak.

Government bonds strong.

State bonds inactive.	BONDS AND STOCK QUOTATIONS—CLOSED BID.

For over two years my little girl's life was made miserable by a case of Catarrh. The discharge from the nose was large, constant and very offensive. Her eyes became inflamed, the lids swollen and very painful. After trying various remedies, I gave her The first bottle seemed to aggravate the disease, but the symptoms soon abated, and in a short time she was cured. DR. L. B. RITCHEY, Mackey, Ind.
